The volume portion of the service charge for residential accounts, is based upon the water meter readings for the months of January, February, March and April, and is recalculated each year. New customers are assigned a usage amount of 800 cubic feet per month (1,600 per 2-month cycle), which is an average usage for a typical household. This figure is adjusted once actual wet months water usage can be determined. New customers wishing not to be assigned this average consumption value shall be entitled to provide verifiable water consumption records from their last prior residence for consideration in establishing the initial volume portion of the service charge. In order to be considered, such information shall be submitted to the District within ten (10) days of establishment of a new sewer account. Existing customers relocating their residence within the District shall automatically retain their existing consumption average for purposes of the volume portion of the service charge.

B. Commencement of Charges - Monthly charges for sewer service shall commence pursuant to Resolution No. 99-887 or any amendment thereto.

3. Availability Charge - The District shall continue to levy, and property owners shall pay, a charge for properties not connected to the sewer system but to which such service is available. The charge shall equal the base monthly sewer rate established for residential service. All such charges levied prior to the date of this Resolution are hereby ratified.
