

LAKEHAVEN UTILITY DISTRICT
King County, Washington

Resolution No. 2012-1197

A **RESOLUTION** of the Board of Commissioners of the Lakehaven Utility District, King County, Washington, establishing a cross-connection control program, superseding Resolution No. 2003-999 and amending Resolution No. 2011-1191.

WHEREAS, the District operates a public water supply system for the benefit of residential and commercial customers within, and without, its approved service area, and

WHEREAS, the existence of cross-connections pose a risk of contamination of the water supply and otherwise threatens the safety of the District's water system, and

WHEREAS, state regulations require that public water supply purveyors adopt standards and practices to protect the system against such contamination, and

WHEREAS, the Board has previously adopted a program to meet the requirements of state law and to protect the water system from the risk of contamination from cross-connections, and

WHEREAS, the Board believes it appropriate and necessary to update the cross-connection control program and to establish a charge for non-compliance with the program;

NOW THEREFORE BE IT RESOLVED as follows:

1. The Board of Commissioners hereby adopts the "Cross-Connection Control Program", attached hereto as Exhibit "A", as is fully set forth herein.
2. The Board of Commissioners reserves the right to amend or modify the "Cross-Connection Control Program" as it shall deem such amendment or modification necessary.
3. Resolution No. 2033-999 is hereby superseded and cancelled in its entirety.
4. A new section shall be added to Resolution No. 2011-1191 under section "3. G. Water Service and Meter Installation Charges/Deposits" to read as follows:
 - x. Failure to comply with requirements of the District's Cross-Connection Control Program will, at the District's discretion, result in an assessment of an administrative charge of \$100.00 per occurrence and/or suspension of water service. Water service will not resume until all charges are paid in full and the Cross-Connection Control Specialist has confirmed the backflow assembly has passed
