

LAKEHAVEN WATER AND SEWER DISTRICT
King County, Washington

Resolution No. 2023-1379

A RESOLUTION of the Board of Commissioners of the Lakehaven Water and Sewer District, King County, Washington, adopting water, sewer and street lights rates and superseding Resolution No. 2022-1377 and all prior rate resolutions and rate resolution amendments.

WHEREAS, pursuant to RCW 57.08.005, 57.08.060 and 57.08.081, the Board of Commissioners is empowered to establish periodic rates for the furnishing of water, sanitary sewer and street light services, and

WHEREAS, in order to ensure that the District will be able to meet the financial requirements for providing reliable water, sewer and street lighting services to its customers, the Board regularly reviews and considers such periodic rates, and

WHEREAS, during a review of the 2023-24 budget, the Board determined that the balances in the sewer fund were being impacted by higher than anticipated levels of labor and project cost inflation, leaving revenues from the planned sewer rate increase of 10% for 2023 less than adequate to maintain an optimal level of financial reserves in the sewer fund, and

WHEREAS, the Board considers it appropriate and necessary to increase sewer rates by 12.5% in 2023 to maintain financial reserves in the sewer fund, and

WHEREAS, the City of Auburn has adopted an 11.5% utility tax that will apply to water and sewer rate revenues collected from customers within the City of Auburn beginning in 2023, and

WHEREAS, in order to reflect the additional cost of service associated with the Auburn tax, the Board increased water and sewer rates to recover the cost of the tax, and

WHEREAS, anticipating that Auburn would begin paying the District's Hydrant Charge in 2023, the Board offset the amount of the increase in water rates associated with the tax by the projected Hydrant Charge revenues, and

WHEREAS, Auburn has since notified the District that it will not pay the Hydrant Charge, and

WHEREAS, with that notification, the Board has determined it appropriate to adjust the water rates by the full amount of the utility tax, and

WHEREAS, the description of the charge the District collects for non-residential irrigation meters in months where no consumption is registered was inadvertently not included in recent rate resolutions and the reference should be restored to conform to the District's intended billing practices, and

WHEREAS, believing that the rates established herein are fair and equitable and will enable the District to meet its financial requirements,

NOW THEREFORE, BE IT RESOLVED as follows:

1. Water Rates - The following rates shall be billed on a bi-monthly basis for water furnished by the District.

A. Single Family Residences

Add \$ 1.20/lb. for B.O.D. and Suspended Solids in excess of 1,000mg/l

D. The volume portion of the service charge for single-family and individually metered multi-family residential accounts is based upon water consumption reflected in water rate bills issued by the District, or other purveyor, in January, February, March, and April. The average of water consumption during this period shall be designated as the "wet-month average" and be recalculated each year. This updated wet-month average shall be used for calculation of the volume portion of sewer service charges for billings transmitted after May 31. New single-family residential customers shall be assigned a wet-month average of 500 cubic feet of water consumption per month (1,000 per two-month cycle). New individually metered multi-family residential customers shall be assigned a wet-month average of 400 cubic feet of water consumption per month (800 per two-month cycle). This amount shall continue until the next wet-month averaging period is complete and the actual consumption can be determined. New customers shall be entitled to provide verifiable water consumption records from their last prior residence for consideration in establishing the initial wet-month average. In order to be considered, such information shall be submitted to the District within thirty (30) days of the first sewer bill.

E. Commencement of Charges –Billing of water rates shall commence on the earlier of the installation date of the water meter to serve the property or the date eighteen

(18) months following payment of the Water System Capital Facilities Charge. Billing of sewer rates shall commence on the earlier of the issuance date of the sewer service connection permit for the property or the date eighteen (18) months following payment of the Sewer System Capital Facilities Charge.

3. Street Light Rates - In order that the District shall recover the \$12.00 per month cost of street lights, all properties within a standard street lighting system established by the Lakehaven Utility District shall pay a monthly charge for such service of \$2.00 per month. In circumstances where the street lights serve more, or less, than six lots, then the amount of the monthly charge shall be adjusted such that the District receives an equivalent \$12.00 cost from the properties served thereby. Properties included within a street light system shall continue to be subject to the monthly charge herein until such time as the property shall be determined to be "non-buildable" by the District. In addition to providing proof of the designation of a parcel as "non-buildable" by the land use authority with jurisdiction over the parcel, property owners may submit as such proof the certification from a licensed soils engineer or licensed septic tank design professional that the parcel will not be suitable for service by a septic system.
4. Duplicate Billing - Where a property owner requests that a copy of the water, sewer and/or street light billing be sent to any address other than the account address, a 0.50 dollars charge shall be added to the bill for each such duplicate billing sent.
5. Capital Facilities Charge Capacity Rental - Beginning with billings transmitted after December 31, 2013, the District shall collect capacity rent from property owners using more capacity in the water and/or sewer facilities of general benefit than was acquired for the property served. The rent shall be billed as a rate under authority of applicable law and shall, for each bi-monthly period, equal one percent (1%) of the current Capital Facilities Charge ("CFC") for each Equivalent Residential Unit ("ERU"), or portion thereof, of capacity used in the water and/or sewer systems in excess of the amount established by the District as the level of CFC credit owned at the property (measured in ERU's). The amount of the CFC and volume of service associated with an ERU of capacity shall be as set forth in the current fees and charges resolution. Each property served by the water and/or sewer systems shall be allocated a CFC credit based upon the level of CFC capacity acquired for the property. Any excess capacity used in the water and/or sewer systems for which capacity rent shall be collected will be allocated in increments of hundredths (.01) of an ERU. The credit level shall be increased by a factor of twenty (20) percent for each ERU credit allocated in the system (e.g. 6 actual credits equals 7.2 credits for rent calculation purposes). In addition, no rent shall be collected for the first full ERU of excess capacity used after the credit adjustment (e.g. a property with a credit of 2 ERU's would begin paying rent for capacity used in excess of 3.4 ERU's). The amount of excess capacity used shall be further based upon the average of use for the prior twelve (12) month period as determined by the volume of water used at the property. Water determined by the District to have been leaked shall not be included in the calculation of water or sewer system

capacity rent. For purposes of determining sewer capacity used, the consumption of water through irrigation meters will not be included in the calculation of sewer system use.

Where multiple water and/or sewer connections exist on a single non-single family residential parcel, capacity rent shall be based on any excess service capacity used for the entire parcel. The capacity rent owing for the period shall be allocated to the service connections based on the service connection's pro rata share of the total consumption at the parcel. Where two or more non-single family residential parcels with a common boundary are held under common ownership, as shall be determined at the discretion of the District, the District will aggregate the credits from all such parcels and levy any capacity rental on the basis of the credits and consumption associated with all such parcels. The capacity rental charge to each service connection on such parcel shall be based on the service connection's pro rata share of the total consumption of the parcel for the period. To avoid the stranding of credits in parcels within a common commercial or multi-family development that are allocated credits (typically where the CFC was paid as an area charge) and are not served by water and/or sewer facilities, the capacity credits for parcels within commercial or multi-family residential developments that do not use water and/or sewer service will be allocated to the other connections within the development in proportion to their pro rata share of the total consumption of capacity within the development.

6. Leak Adjustment Program

- A. Subject to the discretion of the District, customers repairing, and notifying the District of, a water system leak within 60 days of the discovery of the leak will be eligible to have an adjustment made in their water and/or sewer accounts under the terms of subsections ii) and iii) below. No leak adjustment shall be made where the total amount of the leak adjustment is less than fifty (\$50.00) dollars.
- B. For water customers, the reduction in the volume of water charged to the water account will equal 50% of the water lost due to the leak. The volume of water lost due to the leak will be determined by subtracting the volume of water used during the corresponding billing period from the prior year from the volume of water use registered on the meter during the period of the leak. Following the reduction, the remaining volume of water lost due to the leak will be priced no higher than the second block rate applicable to single-family residential customers during the period of the leak. For single-family and multi-family residential customers, the volume of any water leaked shall not be used in determining the wet month average for sewer charges. For commercial customers, any water leaked that does not flow to the District's sewer system shall be excluded from the volume charge for sewer service. In circumstances where the commercial customer's leaked water enters the sewer system, such as through a leaking toilet, the District shall consider the impact of the leaked water on the waste strength and adjust the customer's CDC classification during the period of the leak to reflect dilution of the waste stream.

Leak adjustments may be granted for up to, but not more than, three (3) billing periods for any single leak. In no case shall water leaked under subsection A. be included in the calculation of water and/or sewer system capacity rent under the Capital Facilities Charges Capacity Rental Program established pursuant to resolution of the Board of Commissioners.

C. Customers shall be eligible for a leak adjustment no more than once in a two-year period. Customers applying for a leak adjustment shall submit evidence of repairs completed on their service line and/or internal plumbing system. As proof of repairs made, the District shall require the property owner to submit reasonably detailed receipts for repairs made by third parties. For repairs made by the property owner, the District shall be provided copies of receipts for repair supplies and a sworn declaration describing the repair, including a description and date of the repair work.

7. This Resolution shall supersede Resolution No. 2022-1377 and all prior rate resolutions and rate resolution amendments for billings transmitted after December 31, 2022 and shall become effective on the date of adoption below. There shall be an excise tax of 7.75% added to any Capital Facilities Charge Capacity Rental charges due for water and sewer service inside of the City of Federal Way. There shall be an excise tax of 6% added to any Capital Facilities Charge Capacity Rental charges due for water and sewer service inside of the City of Edgewood. There shall be an excise tax of 11.5% added to any Capital Facilities Charge Capacity Rental charges due for water and sewer service inside of the City of Auburn. The Board reserves its authority to amend this resolution and the rates established herein at any time it deems such amendment to be in the best interests of the District.

ADOPTED by the Board of Commissioners of Lakehaven Water and Sewer District, King County, Washington, at an open public meeting thereof held this 12th day of January, 2023.
